### **Research Experience**

- Since early on in the university I was interested in medical education, my undergraduate thesis was about “effects of the newly set weekly Saturday vacation on academic performance of final years medical students 5<sup>th</sup> &6<sup>th</sup> years in university of Khartoum 2008”
- Participated as a teaching assistant and field supervisor in designing & supervision of d of the mini surveys of the field visits & the rural residency and research we have conducted a mini survey about (awareness and practice of the mothers regarding the care of under five children in Doka city in Al Gadaref state eastern Sudan 2013)
- My master thesis was about “causes management and outcome of acute kidney injury among hospitalized patients in Soba university hospital during 2013 a retrospective study” I got distinction mark and it was one of the best 4 researches in the batch.
- As a teaching assistant one of our tasks is to help the undergraduate students with epidemiological aspects of their research projects

### **Languages and computer skills**

- **Very Fluent in English language with IELTS band score (7) in July 2014**
- **Have good knowledge of basics of French.( successfully completed 1<sup>st</sup> and 2<sup>nd</sup> levels of French language in (Centre culturel français de Khartoum) (CCF)**
- **Excellent in computer skills and internet.**

### **NGOs Volunteering & social development work experiences:**

Volunteer for more than 5 years in activities of Life Makers Non Governmental Organization in Sudan participating mainly in health related programmes of health education against AIDS & Drugs addiction. Participated in campaigns of gathering and distributing humanitarian aids during Darfour crisis 2004

### **Communication and leadership and team work skills:**

- Since the time I was a student, I was active member in the student association, I was also the leader of the life makers NGO team in the university, we have implemented many projects and organized many open days in collaboration of both bodies.
- In the department of community medicine and less than 1 year after nomination I was awarded the academic secretary of the department which carries additional administrative work and requires better communication and leadership skills
- In the department as well, I was involved as a leader in organization of some workshops and field work, the success of which was dependent on the effective team work

### **Courses & Trainings:**

#### **Course &training in medical education:**

- Intensive Research methodology 1 month course held by department of community medicine U of K in 2013

I received thorough training in medical education in the {EDC} Educational development centre for health professions faculty of medicine university of Khartoum in:

- Problem based learning
- Teaching & learning
- Students assessment & evaluation
- Continuing professional development, international medical education scholarship ( a workshop held in Sudan in collaboration with association for medical education in Europe (AMEE)

#### **Public Health Trainings:**

- I have received training course about **“surveillance, outbreak investigation and response”** in the federal ministry of health in collaboration with EMPHNET {Eastern Mediterranean Public Health Network”

- Comprehensive courses in Research Methodology in Department Of community Medicine since January 2013
- Training courses In general management ,Projects & organizations management, communication skills & training of trainers in Health Education about risks of drugs & AIDS prevention. I was participant in campaigns for that at life makers organization

#### **Vision:**

I am looking forward to complete my postgraduate studies, teach and implement community-based researches and projects which I found myself in, to participate in the development of Sudan.
